Networking: TCP/IP, DHCP, DNS, VLAN, LAN/WAN, RJ45/Cat5e/Cat6 Cabling, Switch Configuration, VPN (IPSec, SSL), Network Printer Deployment, Wi-Fi Setup, Basic Firewall Rules

ITSM & Frameworks: ServiceNow (Admin, Workflow), BMC Remedy, I-serve, Jira, ITIL v3/v4 (Incident, Problem, Change, Service Request), SLA Management, Root Cause Analysis, Knowledge Management

Hardware & Endpoints: Desktop/Laptop Diagnostics & Repair, BIOS Configuration, Network Printers, Biometric Devices, POS Terminals, CCTV, Asset Management, Vendor Relations

Development & Tools: Python, PowerShell, Bash, Raspberry Pi, OpenCV, Flask, MQTT, WebSocket, RDP, AnyDesk, TeamViewer, Windows Defender, McAfee, Symantec

Professional Experience

IT Executive — Unity Shared Services Pvt Ltd (JMD Shared Services)

Palwal, Haryana — March 2024 – Present — Multi-State: 50+ Branches (Haryana & Rajasthan)

- Direct end-to-end IT operations for 300+ employees across 50+ microfinance branches. Process 35+ daily support tickets via phone, email, and Microsoft Teams maintaining 98% first-contact resolution rate.
- Architect and deploy standardized LAN infrastructure including Cat5e/Cat6 cabling, RJ45 termination, switch configuration, and IP schemes. Implement network printing solutions and POS terminal connectivity achieving zero-downtime during critical business periods.
- Lead hardware lifecycle from vendor negotiations through procurement, deployment, and maintenance. Maintain comprehensive asset inventory ensuring 100% operational continuity across distributed locations.
- Troubleshoot mobile banking applications resolving connectivity, crashes, and integration issues. Provide tier-2 escalation support for complex technical problems impacting business operations.
- Develop technical documentation including network diagrams, SOPs, troubleshooting guides, and configuration standards. Create accessible knowledge repositories for branch staff and IT teams.

Senior Engineer – IT Service Desk — Microland Limited

Gurugram, Haryana — November 2022 – March 2024 — Client: Maruti Suzuki India Limited

- Delivered L1/L2 support for 200+ users in manufacturing environment processing 40+ daily I-serve tickets. Achieved 95% first-contact resolution and 100% customer satisfaction through comprehensive Windows 10/11, Office 365, and hardware support.
- Administered Active Directory including user provisioning/deprovisioning, security groups, GPOs, and access audits. Implemented ITIL best practices for incident, problem, and change management reducing ticket backlog by 30% through root cause analysis.
- Configured production-critical systems including network printing, production terminals, barcode scanners, and label printers. Coordinated SCCM software distribution, security patches, and Windows updates across 200+ endpoints.
- Authored 50+ knowledge base articles improving team efficiency by 25%. Conducted knowledge transfer sessions and generated reports on ticket volume, resolution times, and SLA compliance for management review.

Desktop Support Engineer — IDC Technologies (Wipro Project)

New Delhi — June 2021 – November 2022 — Client: IDFC First Bank

- Provided L1/L2 support for 300+ banking professionals managing Windows 10/11, Office 365, and proprietary banking software. Processed 50+ daily ServiceNow incidents achieving 95% first-contact resolution while reducing tier-2 escalations by 40%.
- Maintained 100% compliance with banking regulatory requirements (RBI guidelines, information security, data protection, audit controls). Enforced access policies, password complexity, and security awareness protocols while participating in quarterly audits.
- Deployed LAN infrastructure across banking branches including switch installation, VLAN configuration, and network printer setup. Ensured reliable connectivity for RTGS/NEFT transactions, ATM systems, and customer service terminals.
- Provided white-glove support to executives and relationship managers requiring expedited resolution. Conducted training sessions on Windows features, Office 365, security best practices, and banking software rollouts.

Technical Support Engineer — Semtech Infotech Limited (Salas IT)

New Delhi — July 2020 – June 2021 — Project: Facechk AI Biometric System

- Executed live demonstrations of AI-powered facial recognition system for 20+ enterprise prospects achieving 95%+ accuracy benchmarks. Successfully converted 5+ demonstrations into pilot deployments across corporate, educational, and government sectors.
- Designed and delivered technical training for 15+ stakeholders covering Raspberry Pi setup, Linux basics, OpenCV configuration, Flask deployment, and system administration. Developed documentation reducing customer onboarding time by 60%.
- Configured Raspberry Pi edge computing devices for on-premise processing. Implemented camera interfaces, optimized OpenCV algorithms, and deployed Flask web servers for dashboard access and administration.
- Resolved networking challenges involving MQTT messaging and WebSocket connections achieving 100% deployment success. Served as customer-to-development liaison providing feature requests, bug reports, and UX insights.

Education

Bachelor of Computer Applications (BCA)

Maharishi Dayanand University (MDU), Rohtak, Haryana

Graduated: 2020

Key Achievements & Performance Metrics

- Successfully supported 750+ end users across 50+ branch locations spanning multiple geographic regions
- Maintained 99.9% infrastructure uptime through proactive monitoring, preventive maintenance, and rapid incident response
- Achieved 95-98% first-contact resolution on daily ticket volumes of 15-50+ across multiple channels
- Executed zero-downtime deployments for critical infrastructure upgrades and software migrations
- Reduced tier-2 escalations by 40% and ticket backlog by 30% through ITIL implementation and process optimization
- Accelerated customer onboarding by 60% through standardized documentation and training materials
- Consistently earned 100% user satisfaction ratings for technical competence and professionalism

Professional Development

Target Certifications: CompTIA A+, CompTIA Network+, Microsoft 365 Certified: Modern Desktop Administrator, ITIL 4 Foundation
